1. The second and third voluntary amendments filed by Applicants on February 5, 2003 and April 22, 2003 have been received.

2. New claims 80-106 have been added.

Claims 63-79 are pending.

3. Claims 63-106 of this application has been copied from U.S. Patents No. 6,014,327, 6,275,436, 6,356,486, 6,381,172 for the purpose of an interference.

Applicant has failed to specifically apply each limitation or element of each of the copied claim(s) to the disclosure of the application.

Applicant is given THREE MONTHS, whichever is longer, from the mailing date of this communication to specifically apply each limitation or element of each of the copied claim(s) to the disclosure of the application. See 37 CFR 1.607(a)(5). THE PROVISIONS OF 37 CFR 1.136 DO NOT APPLY TO THE TIME SPECIFIED IN THIS ACTION.

4. Claims 63-77 and 80-106 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicants failed to provide an adequate written description of all of the limitations in claims 63-77 and 80-106.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 78-79 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobayashi et al. (U.S. Patent No. 4,219,883) or Cheung et al. (U.S. Patent No. 4,685,082).

Kobayashi et al. disclosed in figure 1 a relationship between a main memory and a cache memory wherein the cache memory [103] is coupled between a CPU [101] and the main memory [102] (column 1, lines 15-20).

Cheung et al. disclosed in figure 1 a prior art computer system having a cache [103] coupled between a CPU [101] and a memory [117] (column 1, lines 55-63).

Kobayashi et al. and Cheung et al. did not disclosed the main memory [102] and the memory [117] are flash memory. However, it is inherent that the main memory would be flash memory to store information in non-volatile manner.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ciacchi and Jensen are cited to show memory devices having cache coupled between CPU and main memory.
